EXPERIENCE

ASSOCIATE WEB DEVELOPER, INDIGI CONSULTING AND SOLUTIONS, GUWAHATI
05/2025-present

Indigi Consulting & Solutions is an IT company established in the year 2018, situated in Guwahati and are the only SAP providing in entire North East India that aspire to provide digital solutions for various kinds of industries for valued clients. Customer satisfaction is of utmost importance in our organization.

BACKEND DEVELOPER, GRATIA TECHNOLOGY PVT LTD, GUWAHATI
01/2024-03/2025

Gratia Technology operates as an IT product development company, collaborating with numerous enterprises worldwide. They function as a technology partner, guiding projects from conception to fruition. With an in-house application development team adept in cutting-edge technologies, they deliver comprehensive technology solutions to their clients.

SOFTWARE DEVELOPER INTERN, NIC SHILLONG, MEGHALAYA

01/2023-06/2023

NIC offers an array of services to both State and Central Government organizations, leaving no avenue unexplored in providing diverse ICT services to offices within the region, thereby establishing a robust foundation for e-Governance initiatives. All ICT services for the State originate from here.

PROJECTS

Attendance & Leave Management System | SSUHS, Assam

Jan 2026 – Present

- Architected a high-precision attendance system using Laravel (API) and React with Inertia.js, ensuring a seamless Single Page Application (SPA) experience.
- Implemented Geo-fencing logic to validate employee locations, ensuring attendance integrity and reducing fraudulent check-ins.
- Developed a comprehensive Admin Dashboard for real-time monitoring of leave requests and automated report generation.

Medimart – E-commerce & Medicine Delivery Platform (https://rxmedimart.com/)

Aug 2025 – Present

- Developed a scalable RESTful API in Laravel to power three distinct mobile applications (Customer, Delivery, and Retailer) built in Flutter.
- Integrated Razorpay Payment Gateway to facilitate secure, multi-party transactions for medical supplies.
- Engineered the web-based Admin and Vendor portals, allowing pharmacies to manage inventory and track real-time delivery logistics.

Recruitment Portal | PNRD, Assam

Oct 2024 – Dec 2024

- Engineered an end-to-end online recruitment portal for high-level IT professional roles using Laravel and MySQL.
- Database Optimization: Refactored complex SQL queries and implemented indexing to handle large-scale applicant data and high-traffic periods during registration deadlines.
- Streamlined the document verification workflow, reducing the manual processing time for recruitment officers.

Academic & Personal Projects

Portfolio Website

- Developed my personal portfolio website using React JS and Tailwind CSS and hosted in Hostinger Cloud.

Content Management System | Meghalaya State Portal

Jan 2023 – Jun 2023

- Contributed to the development of e-Governance solutions targeted at improving digital accessibility for state government services.
- Built modular CMS features using PHP and Laravel to allow non-technical staff to update portal content dynamically.
- Collaborated on UI/UX enhancements to ensure the portal met government accessibility standards

Online Car Rental System

Mar 2021 – Sep 2021

- Developed a P2P rental marketplace using Core PHP and MySQL, enabling car owners to list vehicles and users to book them directly.
- Implemented a custom authentication system and a booking engine with date-conflict validation.
- Managed the full Software Development Life Cycle (SDLC), from database schema design to final deployment.

Some other projects as hobby

Smart Expense Tracker (https://expensetracker.dkonware.com/)

- Developed a lightweight, client-side financial tool to help users manage personal budgeting through daily spending limits.
- Utilized Browser Local Storage for persistent data management, ensuring user data remains private and accessible without a backend.

To Do List (https://dktodolist.vercel.app/)

- Built a productivity application focused on task lifecycle management (Creation, Completion, and Deletion).
- Deployed via **Vercel** with a focus on fast load times and mobile-responsive CSS.

CERTIFICATES

- AWS Cloud Practitioner Essentials
- NPTEL- Digital Image Processing
- NPTEL- The Joy of Computing with Python
